	Price Check: Comparing Costs across stores Investigate the prices of common household items in different stores (e.g., cereal, milk). Activity: You can choose a product and find its price at two different stores in Bahrain. Calculate the total cost if you buy multiple quantities. Example: If cereal costs BD 2.795 at Store A and you want to buy 3 boxes, then you would pay : $BD\ 2.795 \times 3 = BD\ 8.385$ Similarly, find the cost of the same cereal at Store C and find the amount you would have to pay in that store for same number of boxes. Compare the prices of your items in both stores and write the name of the store where you would pay less for your purchased items. Write your findings in an A4 size paper. Write your full name, class and date on it and submit to your teacher this week.
